Real proof of the effectiveness of the Class One F&B systems

A real client (Chief Operating Officer) told me that today, after 23.00 pm, he received a message sent by Class One StarPOS in his smartphone telling him that in one of their establishment there was a ticket with an amount higher than 500€. His reaction was calling the establishment to check if there was a mistake, and they told him:

"The ticket is correct, a VIP player of the spanish national team and Real Madrid is in the pub with his family".

His next action was going to the pub to take some photos with him and publish them in social networks, apart from the appropriate courtesy with him.

Class One triggers management are important and they work. Computers should be more and more intelligent and they must allow us to have situations like the described above that would be impossible if we did not have these tools.
